

Week 1 – What is a Credit Union?

Pre K- 5th Education

April is National Financial Literacy Month, which is designed to create awareness about the importance of personal financial education. Over the next 4 weeks, we will be exploring different financial education topics with specific age-minded activities and links, designed for your use at home.

This week's topic is What is a Credit Union? For our youngest members, we believe that coin recognition and learning about money is really the first step in understanding why we need a place for our money and how we use a credit union. Included are some activities, games and a link to "The Money Song" to assist with money counting skills.

Money counting activities and games:
